

# NETCHARTS PERFORMANCE DASHBOARDS

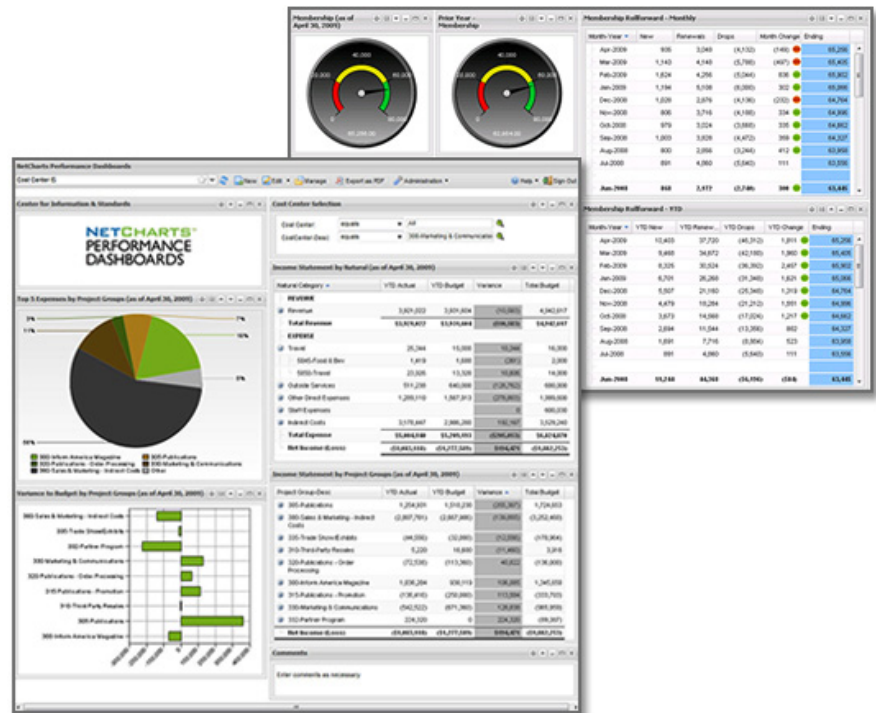

Best-of-Breed, 2009  
BusinessFinance

NetCharts Performance Dashboards (NCPD) is a powerful, interactive, web-based business intelligence dashboard solution that enables less technical end-users to explore, analyze, and understand data in ways they have not been able to before – on their own and in ways relevant to their role within the business.

NCPD combines the latest in user interface design with powerful and familiar features from Windows and Excel. This unique combination provides a superior end-user experience that promotes enterprise-wide adoption and drives better business results.

Wizard-based installation and configuration guide you through selecting data source(s), key performance indicators (KPIs), and visualization styles to build personalized dashboards. You can easily share dashboards with other users, or publish dashboards to specific groups.

Powerful 'on-demand' dashboard controls are hidden, surfacing only when you want to make adjustments or begin exploring data. This ensures a clean, simple interface that keeps the focus on your data, key performance indicators, goals and alerts.

## Business Benefits

- **Explore and analyze data on your terms** without leaving the dashboard, writing queries, or constantly calling IT
- **Drive better business results** – by exploring, analyzing and understanding data when and how you want
- **Become more effective and efficient** – by transforming spreadsheets, reports, and raw data into actionable information
- **Prove your point** – engage, inform, and persuade internal and external customers with compelling competitive analysis and data visualizations
- **Remove the risk** – with NetCharts Performance Dashboards Money-Back Success Guarantee\*

*“NetCharts Performance Dashboards emphasizes ease of use and flexibility for the end user. The graphics are visually appealing and its four-step process for accessing data and creating dashboards is intuitive... it’s an impressive and cost effective product that any company should look at ...”*

*- Wayne Eckerson, Director, TDWI Research*

*“NetCharts Performance Dashboards allows business end-users to be self-sufficient... making it easy for users to create their own KPIs specific to their job role, work function or business unit.”*

*– Claudia Imhoff, Ph.D., President and Founder, Intelligent Solutions*
